

The Hone Masters Engraving System

The Hone Masters Engraving System is an advanced kit developed by Dr. Lew Jensen and ParaGraphics Master Engravers, Keith and Craig Hone. This kit was designed to give Paragravers the best of two worlds, High Speed Engraving and Slow Speed Engraving. With this advanced Paragraphics system, you will receive a Genesis Engraving System plus our newest addition, The QC 700 Engraving System. This kit will include everything you need to get a quick start in an engraving business or just a fun hobby. The Genesis System will provide you with High Speed Engraving Equipment, which is great for producing intricate, high detailed work. The QC 700 will give you the ability to remove more material in a fraction of the time, invaluable in Wood Carving. The QC 700 Handpiece accepts both 3/32" Burrs and 1/8" Burrs for larger jobs. You can also turn out great relief carvings in much less time with the QC 700. These two engraving systems compliment each other very well and that is exactly why Dr. Lew Jensen and The Hone's have incorporated these two engraving systems into one. All of the Equipment sold by Profitable Hobbies Corporation are high quality, proven products with the best warranties in the business.

The Hone Masters Engraving System includes the following:

1. Complete Genesis High Speed Engraving System-To see complete Genesis description [CLICK HERE](#).
2. Complete QC 700 Slow Speed Engraving System-To see complete QC 700 [CLICK HERE](#).

Please visit these pages to see their complete descriptions and contents.

The only difference will be the carrying case. The Genesis System comes with a small case and with the Hone Masters System, both kits are combined into one large carrying case.
