

The NSK V Max Electric Engraving System

This is a high quality, commercial grade electric system. System includes NSK Electric Handpiece, Commercial Control Unit, Variable Speed Foot Control, and Handpiece cradle.

Operates on standard 120v AC. Control unit digitally displays speed. Maximum speed is 35000 rpm. Also has an auto speed function which will hold a steady speed for long project without the use of the foot control. Handpiece provides ultra quiet, smooth operation with high torque and no vibration. Handpiece accommodates 3/32" burrs and 1/8" burrs with 1/8" chuck (sold separately).

When you purchase from Profitable Hobbies, you will also get a very professional carrying case, for a professional appearance in the marketplace. You will also receive our support number for additional answers to questions, whenever they may arise. Don't forget our ongoing FREE internet conferences every week to inspire and encourage you to do more in this exciting engraving world.

We also offer many classes for our Electric Engraving Systems. If you are looking for a quick start, or maybe just a little "hands on" instruction, we have a class for you. Be sure to visit our Training Classes page to see the latest schedule.

Nobody has been selling, servicing and teaching how to use engraving equipment longer than Profitable Hobbies.
