

# TPS Electric Engraving System

Looking for a high quality micromotor machine without the high price tag? Well, we've been looking for such a machine for years now, and we have finally found one! Our new Japanese-built TPS micromotor has all the features you want in a micromotor: quick bit changing, forward and reverse, removable or adaptable collets, a full-torque-at-all speed controller, a rubber handpiece cradle, and a small, comfortable handpiece that delivers 35,000 smooth, quiet, powerful RPMs, at about half the price of similar units. The kit is supplied complete with a controller and one handpiece that includes a 1/8" collet and 3/32" collet adapter, and it all comes with our unconditional one year warranty. Please allow additional time for shipping.

## **Includes the following:**

Electric Handpiece with 1/8" Chuck - 35,000 rpm handpiece

3/32" Adapter to accommodate 3/32" burrs

Controller with Forward and Reverse

Rubber Handpiece Cradle

Unconditional One Year Warranty
