The Genesis System

A Complete Custom Hand Engraving
Start Up System

Our Complete Starter Package (The Genesis System), includes all of the initial materials and equipment (except a compressor) that you will need to start learning this exciting new Ultra-High Speed Engraving and Carving World. This Package also includes 5 hours of dvd instruction which covers all set-up and equipment issues plus a complete basic hand engraving course. This course is taught by Dr. Lew Jensen, who is the founder of Ultra-High Speed Engraving and the inventor of the first straight Paragraver Handpiece. This system is designed to give you the best equipment and some great ideas to get you started quickly in the High Speed Engraving World.

The Genesis System includes the following:

Ultra High Speed Handpiece- It's your choice, we carry the finest high speed engraving tools in the world. Choose from our USA made, commercial grade Turbo 300, or go with one of the popular oil less models, it's your choice. (Warranties and Contents of the kit will vary slightly depending on which handpiece you choose.)

Automatic Filter/Regulator/Lubricator- All compressors create dust and humidity problems and can cause serious damage to High Speed Air Turbines. Our patented "micro fog" unit is the most precise lubricator in the industry. It will extend the life of your equipment and make lubrication "worry-free". Lubrication goes to the turbine, but not onto your engraving surface.

Parapoint Burr Sampler- There is a wide range of quality in the world of High Speed Cutters. We provide the finest grade cutters available. This system includes 12 Diamonds and 12 Carbide cutters which is a complete cross-section of all the major cutters required for most surfaces.

Five Hours of DVD Instruction- We have collected all of the information that thousands of our network of end users have shared with us and produced this series. This series includes safety and maintenance issues as well as an overview of all the cutting tools used on everything from eggshells to steel.

Instruction Manual- Complete written instructions to set up and maintain your system.

Aluminum Case- This case will allow you to carry and keep all of your equipment and materials for custom engraving together, while reflecting a professional image.

Photo Sensitive Stencil Film- This production grade pattern film is easy to use and will work with any copy machine or laser printer. Any un-copyrighted artwork can be easily transferred onto this film and then traced onto any surface.

8 oz Handpiece Oil.- Lubrication is the single largest factor in the longevity of a High Speed Handpiece. Ours is the only Turbine that requires lubrication, making it the longest lasting Handpiece on the market today. A small mist of oil is sent to the handpiece at all times through the lubricator. Just put oil in the lubricator and set the drip rate, the rest is done automatically.

Hoses, and Fittings- We provide all necessary hoses and fittings to connect your system to most compressors. Just connect one end of the compressor hose to your compressor, using the 1/4" fitting provided, and connect the other end to the regulator using the provided quick connect.

Introductory Artwork CD ROM- 100 un-copyrighted artwork ready to print. This is a great start to your own library of artwork. Designs range from animals to wedding patterns and everything in between. Print artwork from any computer.

Handpiece Stand- This sturdy plastic handpiece stand will hold and protect your handpiece while not in use.

One Year I&E Membership- This membership entitles you to online video training, discounts on supplies, recorded webinars, wholesale products and more. (Visit <http://iandenetwork.com> to learn more.)

Turbine Warranty- Turbine warranty period depends on the handpiece you select. The Turbo 300 includes a two year warranty, the NSK Presto and Shofu Lab Z Air include 90 day warranties. The Turbo 300 and NSK Presto can also be rebuilt at a much lower cost than replacement.

One Year Free Technical Support- We have a full-time staff and trained technicians ready to assist you at all times. Help is just a free phone call away with our 1 800 number.

Prices and contents subject to change without notice.
